

GRADUATE SOFTWARE DEVELOPER –Mobile Applications

Key technologies - Java, C++ or Objective C with knowledge of SQL, PHP, XML, HTML, CSS, JS, LAMP

Salary Dependent of Experience

This is a fantastic opportunity for a talented Software Developer to join this award winning Scottish Company. We are producing rich Internet applications and technology solutions for the fashion Industry. Our reputation for developing Mobile Applications for leading e-commerce customers is outstanding and due to increased growth of our business we are looking for a Software Developer to contribute to all aspects of the project life-cycle.

This role is to join our dynamic software development team making use of your existing LAMP skills to continue to develop our innovative and groundbreaking new technologies and iPhone applications. You will also be exposed to new technologies including RIA development with Adobe FLEX and real-time web communications using XMPP.

It is desirable that you will have experience of working on real-world iPhone or other Mobile Applications in an exciting and fast moving industry. Candidates with object orientated programming experience in other client server environments will also be considered.

Essential skills for this role would be experience in a software development environment, particularly using some of the following technologies C++, Objective C, My SQL, PHP, XML, HTML, CSS, Java or Action Script

The job requires someone with initiative, confidence and relevant experience, as you will be relied on to produce quality solutions working to deadline and you will need excellent written and verbal communication skills. This is a permanent role. You will be based in our City Centre Edinburgh office.
