

NPA Graduate Case Studies

Hear from one of our graduates that recently undertook the NPA Fundamentals in Computing, talking about the new-found skills that he has gained and his keen interest in a career in computing and technology.

"I would highly recommend this course to anyone wanting to develop their skills in computing, and those interested in the computer security/networking field. It has allowed me to gain a deeper understanding of IT networking and security through the in-depth material provided, and I feel more confident and prepared for a career in computing.

I liked the level of detail provided in the course materials, and the ability to test your knowledge at each step through the use of virtual labs and multiple-choice questions. The ability to engage in discussions also allowed me to learn and gain a second perspective on topics from others in the group.

With my new qualification, I hope to attain an entry level job within in a computing position, such as a help desk role, before progressing further in my career."
