

## CLIMATE TECH CASE STUDY

### Land Use

#### **Intelligent Growth Solutions**

In Dundee, Intelligent Growth Solutions takes innovation in food production and Climate Tech a stage further with platforms that deliver ideal climates for growing food plants indoors.

Vertical farming has the potential to not only reduce our emissions in farming and agriculture, but it also has the ability to create sustainable and economically viable jobs in the farming and agricultural sector.

The key skillsets in this job very much focus on data mining. In farming, precision agriculture data mining is used to minimise the use of water, fertiliser, and pesticides.<sup>1</sup>
